The United States
FHI 360: Combating HIV/AIDS in immigrant families, especially for low-income families. FHI 360 staff managed the DEBI Project, which brought science-based HIV prevention to communities.

The DEBI Project
Behavioral Interventions for HPTN. Funded by CDC, DEBI is a program designed to develop, evaluate and disseminate biomedical HIV prevention research findings and information to communities, especially those most affected by HIV/AIDS.

The CBA Resource Center improved communication and collaboration among key stakeholders in the field to eliminate HIV/AIDS. The CBA Resource Center launched an online resource center, MyCBA.org.
