MILES BEYOND

MOBILES

TECHNOLOGY IN DEMOCRACY & GOVERNANCE IN 2025

FHI 360 convenes leaders in the fields of cutting-edge technology

We gather leaders in artificial intelligence, nanotechnology, wearable internet devices and more with development experts to discuss the implications these devices will have for international development, and specifically the field of democracy and governance, in the coming decade.

Looking beyond mobiles, it is time to think about the next generation of tech and its transformative potential in the democracy and governance sector.
