

# FHI 360 at AIDS 2018

## SATURDAY, JULY 21

---

### PRE-CONFERENCE

#### **OPTIONS Consortium — Insight to Impact: Driving Demand Creation for HIV Prevention**

Kristine Torjesen and Brian Pedersen, FHI 360,  
United States

### PRE-CONFERENCE

#### **TRANS action: Building Bridges to Safety**

Robyn Dayton, Emily Evens and Michele Lanham,  
FHI 360, United States

## SUNDAY, JULY 22

---

#### **Changing The Game in Adolescent-Centred Design: Assets, Access, Adherence**

**PANEL:** Adolescent Health and the SDGs: How Can We  
Extend Infrastructure Built for the HIV Response to  
Achieve Universal Access for Adolescents?

### PRE-CONFERENCE

#### **Generation Now: Our Health, Our Rights**

Making the Case: Ending Silos Once and  
for All with Evidence

Rose Wilcher, FHI 360, United States

## MONDAY, JULY 23

---

### PRE-CONFERENCE

#### **Generation Now: Our Health, Our Rights**

Making the Case: Ending Silos Once  
and for All with Evidence

Rose Wilcher, FHI 360, United States

### SATELLITE SESSION

#### **HIV Prevention for Women**

HIV Prevention Trials Network (HPTN)

## TUESDAY, JULY 24

---

### ORAL ABSTRACT SESSION

#### **Improving Technical Efficiency: Reaching first 90 through Community Index HIV Sexual Network Testing in Zimbabwe. The case of FHI 360 Zimbabwe**

Auxilia Muchedzi, FHI 360, Zimbabwe

### ORAL ABSTRACT SESSION

#### **Taking Testing to the Next Level**

## WEDNESDAY, JULY 25

---

### ORAL ABSTRACT SESSION

#### **Burden of sexually transmitted infections and prevalence of HIV among key population individuals presenting with STIs in Nepal**

Durga Prasad Bhandari, FHI 360, Nepal

### ORAL ABSTRACT SESSION

#### **Keep your Eyes on OIs and STIs**

#### **Community Patient Tracking by Lay Community Health Workers (CHWs) is an Effective Strategy Towards the 2nd and 3rd 90**

Boitumelo Malebogo Morapedi,  
FHI 360, Botswana

### ORAL ABSTRACT SESSION

#### **I Want You Back: Improving Retention on HIV Programmes**

## COMMUNITY WORKSHOP

### **Doing No Harm: Practical Approaches for Implementing HIV Programs and Delivering Services with and for Key Populations**

Robyn Dayton, FHI 360, United States

### **From 90-90-90 Towards HIV Elimination with Boosted-Integrated Active HIV Case Management (B-IACM) in Cambodia**

Sopheap Seng, FHI 360, Cambodia

## ORAL ABSTRACT SESSION

### **Tough Choices, Smart Decisions, Maturing Responses Mechanism for Data Safety and Security**

Hally Mahler, FHI 360, United States

## SATELLITE SESSION

### **HIV, Human Rights, and Sustainability: From Analysis to Action**

## THURSDAY, JULY 26

---

## GLOBAL VILLAGE WORKSHOP

### **Crowdsourcing Contests: Interactive Introduction to WHO/TDR Practical Guide**

Matt Avery, FHI 360, United States

### **Double-sided HIV Cascades for Key Populations**

Chris Akolo, FHI 360, United States

Bridging Session: The Double-sided Cascade of Prevention and Care and Beyond

## SATELLITE SESSION

### **Getting PrEP to Where It's Needed Most: A Global Conversation Led by African Men Who Have Sex with Men (MSM)**

Chris Akolo, FHI 360, United States

### **Integration of GBV into HIV/STI Services Increases Uptake of Post-GBV Care Services Among Key Populations, Lessons Learned from Papua New Guinea, 2015-2017**

Ignatius Ulah Mogaba, FHI 360, Papua New Guinea

## ORAL ABSTRACT SESSION

### **Confronting Violence Against Women**

### **Launch of the Journal of the International AIDS Society Supplement — Optimizing the Impact of Key Population Programming Across the HIV Cascade**

Rose Wilcher, FHI 360

## SATELLITE SESSION

### **Outreach 1.0, 2.0, 3.0: Getting to the Next Generation of Technology-mediated Outreach in Key Population HIV Programmes**

Ben Eveslage, FHI 360, United States

## WORKSHOP

### **New Information and Communication Technologies: Opportunities for Empowered, Person-centered Healthcare**

## ORAL ABSTRACT SESSION

### **Testing for 2030: Novel Strategies for the Home Stretch**

Gift Kamanga, FHI 360, Malawi

### **When Situations Go from Bad to Worse: Strengthening Collective Action During Periods of Crisis Through Concrete Guidance and Principles for Engagement**

Robyn Dayton, FHI 360, United States

## ORAL ABSTRACT SESSION

### **Community System Strengthening — Sustainable HIV Response**

# POSTER PRESENTATIONS

Posters will be presented from 12:30-14:30 Tuesday through Thursday.

- "Abuse from the police is just normal business": The health impact of violence perpetrated by police, military, and other public security forces on men who have sex with men in El Salvador
- "Neither safe nor secure": Systematically addressing safety and security in HIV programs for key populations to protect implementers and facilitate effective programming
- "The magic" of drop-in centers in improving access to HIV prevention, care, and treatment services for FSW in Mangochi, Malawi
- "We're going to leave you for last because of how you are": Transgender women's experiences of gender-based violence in healthcare, education, and legal settings in Latin America and the Caribbean
- "What is not measured is not managed" - Implementing a routine technology-based patient feedback system to reduce stigma and discrimination in key population HIV services in Malawi
- A digital application for optimizing key population mobile testing in Jakarta's fast-track response
- A lesser-known epidemic : HIV and STI prevalence among key populations in Angola
- A Qualitative Evaluation of Women's Experience Receiving Drug feedback in MTN-Q25/HOPE -an HIV Prevention Open-label Trial of the Dapivirine Vaginal Ring
- A review of implementing prep demonstration projects for the ministry of health with multiple partners and LINKAGES/Swaziland
- Accelerating data use for Indonesia's Fast-Track response
- Accelerating HIV testing uptake among men who have sex with men in Jakarta's Fast-track response
- Accelerating Implementation and Scale-Up of Comprehensive Programs for HIV Prevention, Diagnosis, Treatment and Care for Key Populations: Critical to HIV Epidemic Impact
- Accuracy and cost of reaching men who have sex with men for HIV prevention through Facebook's ad manager in the context of Cambridge Analytica
- Achieving 100% annual burn rate: A myth or reality? - The Strengthening Integrated Delivery of HIV/AIDS (SIDHAS) project Experience in Nigeria
- Achieving Sustainability of Nigeria's HIV Response through the Private Health Sector
- Ambitious goals, restrictive environments: accelerating HIV testing uptake among men who have sex with men in Jakarta's Fast-Track response
- Applying innovative methods to improve HIV testing uptake and case finding among men who have sex with men in Mali
- Assessing Community Health Worker's Counseling Competencies in Community-Key Population-Led Health Services
- Assessing the Family Planning Needs of People Living With HIV/AIDS in Cross River and Akwa Ibom States, Nigeria.
- Assessing the reliability of a new rapid population size estimation method for men who have sex with men and transgender people using Facebook marketing data in Cambodia
- Barriers and facilitators to improve antiretroviral therapy initiation among men who have sex with men and transgender women in Thailand
- Boosted Integrated active HIV case management (B-IACM) in Cambodia
- Bottom up or top down? Balancing the mix in annual HIV/AIDS operational planning and implementation for sustainability in HIV/AIDS service provision in Nigeria
- Bridging communication gap in HIV care and treatment programs through Closed user group(CUG) mobile technology: An approach to financing HIV patient monitoring and referrals services on the Strengthening integrated delivery of HIV/AIDS services(SIDHAS) project
- Building on NAKED outreach to increase sex workers' engagement in and uptake of HIV services in Suriname: Chances for Life's experience applying a five-step approach to HIV-focused outreach
- Burden of sexually transmitted infections and prevalence of HIV among key population individuals presenting with STIs in Nepal
- Capacity development for improved performance of organizations serving key populations with HIV services
- Casting a Broader Net: Increasing HIV Case-Finding Among Key Populations using Performance-Based Incentives and Social Networks in Cote d'Ivoire
- Coerced First Sex among Adolescents Living with HIV in the Copperbelt, Zambia: Cross-sectional Analyses of Prevalence and Associations
- Community health workers facilitate access to tuberculosis (TB) diagnostic services for clients with limited access to health care
- Community/facility strategies to promote adherence to ART and VL awareness amongst PLHIV in Botswana
- Curated "meet-ups" to engage online men at risk of HIV in a service delivery program in Jakarta
- Delivering a high-quality comprehensive package of HIV prevention, care, and treatment for key populations is possible: Experience from two years of the FHI 360 LINKAGES Malawi project
- Density mapping of dating app users across time and space in Mumbai, India
- Developing a voluntary partner referral strategy for HIV testing among key populations: a pilot program in the Dominican Republic
- Differentiated service delivery models for HIV testing among female sex workers: lessons from the LINKAGES project in Blantyre, Malawi
- Doing no harm: Practical approaches for implementing HIV programs and delivering services with and for key populations
- Don't assume health is our only concern: moving to customized care in Suriname to better meet key populations' needs
- Drug-drug interaction between the use of feminizing hormone therapy and pre-exposure prophylaxis among transgender women: the iFACT study
- Effectiveness of mobile clinics in reaching and serving key populations at risk of HIV in Nepal
- Effectiveness of outreach versus walk-in channels in reaching HIV-positive individuals from key population (KPs) in Thailand
- ENHANCED PEER OUTREACH APPROACH (EPOA): A QUICK WAY OF REACHING OUT TO KEY POPULATIONS, LINKAGES PROJECT, MALAWI
- Enhanced Peer Outreach Approach Skill Building Workshop

## POSTER PRESENTATIONS *(continued)*

- Enhancing HIV testing coverage through peer-driven recruitment models among transgender women in Pattaya
- Enhancing outreach for amplified case finding in Jakarta's Fast Track response
- Ensuring the availability of holistic HIV and violence response services in low-resource settings through civil society's leadership: A review of an interinstitutional technical working group in the Dominican Republic
- Escorted referral by peer navigators improved linkage to HIV care and treatment services for FSW in Mzuzu, Malawi
- Evaluation of Integrated social marketing campaign to promote HIV treatment and health insurance coverage in Vietnam
- Experience from implementing the Enhanced Outreach Approach in Port Moresby, Papua New Guinea, 2013-2017
- Experience of reaching hard-to-reach people who inject drugs through field mentors with HIV prevention and treatment services in northeastern states of India
- Family Connections: Assessing the feasibility, acceptability, and trends in outcomes in a randomized controlled trial piloting an intervention with adolescents living with HIV and their caregivers in Ndola, Zambia
- Feasibility of Improving Access to Quality Antiretroviral Therapy through Community Pharmacies in Mozambique
- Female sex workers and their children: the need to provide HIV services for both populations within one joint program
- FHI360's community system for community HIV services including high yielding Index and sexual network testing in Zimbabwe
- Finding them with our head in the clouds: Virtual mapping of key populations
- Friends helping friends to know their status: reaching HIV testing naïve-clients using an innovative, peer-driven outreach model among key populations in Thailand
- GAYOK Bangkok: Increasing PrEP awareness among young gay men in Bangkok with a scripted web series
- Gender in Biomedical HIV Prevention Trials in sub-Saharan Africa: A Review of the Issues and Recommendations for Gender-Transformative Research
- Gender-based violence against key populations in Mali: prevalence and access to primary care in LINKAGES project-supported zones
- Going Viral: Comparing the Efficacy of HIV Testing Campaign for MSM in Bangkok via Facebook and Gay Dating Apps
- Hidden epidemic in Akwa Ibom State: findings from the first AIDS Indicator Survey (AIS) in Nigeria
- HIV outreach in new dimensions: Expanding to key populations in virtual hot spots in Nepal
- HIV prevalence and risk factors among adolescents: findings from 2017 Akwa Ibom AIDS Indicator Survey (AKAIS), Nigeria
- HIV-related risk behavior among female sex workers: programmatic experience from Nepal
- Homebased index case HIV testing modality incurs similar risk of testing know HIV positives as the Provider Initiated HIV Testing modality: Results from two provinces of Zimbabwe
- How are Economic Factors and HIV Risk Related? A Social-Ecological Exploration of the Relationship between Economic Factors and HIV Risk among Adolescents in KZN, South Africa
- Identifying more HIV positive males through Homebased index case HIV testing as compared to facility based HIV testing: Case of an FHI360-Zimbabwe Project.
- Implementation of the CARGs Differentiated Care Model is feasible in Zimbabwe: Lessons from the FHI360 Zimbabwe HIV Care and Treatment (ZHCT) Project
- Implementing a Performance Based Incentive System for Outreach Workers in a Community Based HIV care and Treatment project in Zimbabwe
- Implementing violence prevention and response at scale as part of HIV programming for members of key populations: A process that can and must become the norm
- Implicit drivers of HIV transmission between adolescent girls and young women (AGYW) and their Male Sex Partners (MSPs): Key findings from South African AGYW Male Sex Partners Mapping and Characterization Study
- Improving access to HIV testing services among clients of FSWs: Experiences of the LINKAGES project in Zomba and Machinga, Malawi
- Improving HIV case finding through targeted peer-driven recruitment models
- Improving HIV case-finding through targeted peer-driven recruitment models
- Improving HIV treatment uptake among HIV-positive female sex workers in Naivasha, Kenya
- Improving Intensified Tuberculosis Case Finding in 3 Clinics in Port Moresby and Madang - Papua New Guinea, 2015-2017
- Increasing HIV case identification and linkage to antiretroviral therapy through nutrition screening: Lessons learned from the Cote d'Ivoire Nutrition and Community-Facility Linkages Activity (NCFLA)
- Increasing the efficiency and cost-effectiveness of HIV community outreach program with pay-for-performance incentives
- Increasing uptake of HIV testing services and HIV case finding among stable partners of female sex workers through targeted outreach in Côte d'Ivoire
- Index partner testing in the community key to identifying new people living with HIV (PLHIV)
- India moving online: An HIV risk vulnerability profile of men who have sex with men reachable through online and social media platforms
- Innovative solutions to enhance community based data systems: experiences from Botswana on the DHIS-2 tracker capture
- Integrated gender affirmative hormone treatment services improve access to and retention in HIV testing, syphilis testing, and pre-exposure prophylaxis (PrEP) service uptake among transgender women in Thailand
- Integrating HIV Testing Services (HTS) Into Household Vulnerability Assessments (HHVAs): A window to meeting the first 90 among children and adolescents in 124LGAs in Nigeria
- Integrating violence response and HIV services for men who have sex with men, female sex workers, transgender women, and people living with HIV: The benefits and beneficiaries are widespread
- Integrating voluntary referral from HIV-positive people into a risk-network engagement approach to improve case detection and linkages from outreach in India
- Integration of community and facility care across the continuum to improve pediatric ART enrolment and retention: Lessons learned from Munhava Health Centre, Beira-Mozambique

## POSTER PRESENTATIONS *(continued)*

- Integration of GBV into HIV/STI services increases uptake of post GBV care services among Key Populations, lessons learned from Papua New Guinea, 2015-2017
- Integration of HIV services enhances defaulter and loss-to-follow-up tracking in a female sex worker program in Botswana
- Integration of the SIDHAS project into faith-based organizations (FBO): Comparative analysis from program management and HIV programming with FBOs in Akwa Ibom State, Nigeria
- Interactive Voice Response (IVR) HIV intervention for Key Populations
- Is it time to integrate innovative combination prevention approaches with conventional peer outreach to enhance HIV case-finding? An experience from India.
- Key Population-Led Health Services (KPLHS) increase access to HIV services among transgender women sex workers in Pattaya, Thailand
- Large gaps towards 90-90-90 goals among key populations in Mozambique
- Leave no stone unturned: multi-strategy structural response for KP programming in Swaziland
- Lessons Learned from Implementing the first AIS in Nigeria
- Lessons learnt from a novel HIV Care and treatment funding model for health facilities in Nigeria, a resource constrained country: The reimbursement for incidentals (RFI) funding model
- Leveraging a community-led HIV testing approach to reach female sex workers in the geographic areas uncovered by the national program in India
- Leveraging a novel HIV/Syphilis Duo assay to increase Diagnoses among female sex workers at drop-in centres in Cameroon
- Low prevalence and incidence of hepatitis C among men who have sex with men and transgender women in a key population-led Test and Treat cohort in Thailand
- Mapping, size estimation, and validation for microplanning: LINKAGES/swaziland's approach to accelerating reach among key populations
- Mobilizing community supporters to increase treatment enrollment in Nepal
- Modeling the potential impact of the Dapivirine Ring for HIV Prevention
- Monitoring strategies for HIV drug resistance in PrEP rollout settings
- National identification and health insurance coverage among key populations in Jakarta, Indonesia
- Need-based care to improve linkage to HIV services for female sex workers in Botswana
- Network-based recruitment is more effective among key populations in urban areas of DRC
- One social media strategy doesn't fit all: comparisons between different online approaches for men who have sex with men in promoting HIV testing and improving HIV case finding in Thailand
- One social media strategy doesn't fit all: comparisons between different online approaches for men who have sex with men in promoting HIV testing and improving HIV case finding in Thailand
- Participation in adherence counseling session improves retention among HIV-positive key populations on ART in Angola
- Peer Mobilization for improving the HIV cascade: Results of a innovative outreach model used to reach key populations in Thailand
- Peer navigation is strongly associated with increased uptake of same-day ART initiation among KPs living with HIV in Angola
- Peer navigation strengthens linkage to care among newly HIV-positive FSWs in Haiti
- Peer Navigation Skill Building Workshop
- Pilot results of a client-led online system for assessing risk, learning about HIV, and links to HIV testing in Nepal
- Princess PrEP Program: a successful Key Population-Led PrEP model in Thailand forming through intensive and meaningful participation of key populations
- Private sector opportunities to deliver oral PrEP to women
- Promoting HIV Risk Awareness Among Key Population Through Tablet-based Outreach Risk Screening in Cambodia
- Promoting Quality Assurance in HIV/AIDS Service Provision using Site Improvement through Monitoring System (SIMS) Tool in 4 States in Nigeria
- Rapid population size estimation of online men who have sex with men using Facebook marketing data in India
- Reaching more children and adolescents with HIV Testing Services: findings from the first AIDS Indicator Survey (AIS) in Nigeria
- Reaching the first 90 through Community HIV Testing Services requires use of digital systems to understand geo-coverage. A case of implementing DHIS2 Mobile tracker during HIV testing.
- Retention and adherence to PrEP among MSM and transgender women in Thailand's 'Princess PrEP program': the Key Population-Led PrEP Program
- Review of Strengthening Integrated delivery of HIV/AIDS project (SIDHAS) Accountability framework of HIV/AIDS financing with civil society organizations, government agencies and private institutions in Nigeria
- Same-Day ART Initiation in HIV/STI Testing Center in Bangkok, Thailand: Initial Results from an Implementation Research
- Same-Same but Different: Expanding HIV Testing and PrEP to New MSM Subpopulations through the Private-Sector Pulse Clinic in Thailand
- Setting up client-centered community Anti-retroviral refills - experience from Strengthening Integrated Delivery of HIV/AIDS Services (SIDHAS) project in Rivers State Nigeria.
- Sex and age differences of clients accessing post gender based violence care services in selected states in Nigeria
- Sexual Reproductive Health (SRH) Services Enhances Entertainment Worker Engagement in HIV Services in Cambodia
- Should "Peer" be taken out of Peer Navigation? Acceptability of Peer Navigation Support Among HIV-Positive Key Populations in Burundi, Cote d'Ivoire, Nepal, and Suriname
- Social cohesion events: Suriname Men United's experience with an innovative outreach approach to reach new men who have sex with men and transgender people in Suriname
- Strengthening a peer-led referral system to improve HIV service uptake among FSW in Malawi
- Successfully reaching young key populations with essential HIV prevention, care, and treatment services in Mali
- Support group sessions: experience of Foundation He+HIV/Pluspunt.sr in supporting HIV-positive men who have sex with men in Suriname

## POSTER PRESENTATIONS *(continued)*

- Supporting Victims of Violence in the Context of HIV Programs for Key Populations: Essential Skills and Strategies for Peers, Outreach Workers, and Health Care Providers
- Sustainability in the Provision of HIV Services: The use of sustainability roadmaps for reducing donor dependency in HIV/AIDS services provision in selected Nigerian states
- Sustainable laboratories for key population-led HIV services in Thailand: mentoring and twinning lead to government accreditation and financing
- Sustainable laboratories for key population-led HIV services in Thailand: mentoring and twinning lead to government accreditation and financing
- Sustaining the active participation of key population-led civil society organizations in Indonesia's transitioning HIV response
- Taking ART to the Community to Improve Linkage to Care of Newly Diagnosed HIV Positive Clients in a Community Based Care and Treatment Project in Zimbabwe
- Targeted community outreach is necessary to track testing eligibility among key populations to achieve the first UNAIDS 90: experience from a female sex worker program in Burundi
- The Domino Effect: Tapping into Female Sex Workers' Social Networks to Increase Demand and Use of HIV services from Previously Unengaged Women in Burundi
- The enhanced peer outreach approach: an innovation to increase key population reach and HIV case-finding in Swaziland
- The peer navigation model successfully facilitates linkage of eligible key populations to treatment in India
- The Sex Worker Virtual Currency: Incentivizing Peer Educators to Expand Peer Mobilization among Female Sex Workers in Kisumu County, Kenya
- Tricycles for Linkage to HIV care and Treatment: Breaking transport barriers in Lagos, Nigeria
- Understanding experiences of violence and knowledge about available psycho-social services among key populations in Botswana
- Unmet Treatment Needs of Clients of Female Sex Workers in Port Elizabeth, South Africa and Implications for Estimating HIV Transmission Dynamics
- Use of peer support to enhance linkage to care and treatment for defaulters: lessons from a female sex worker project in Botswana
- Using a community-based tracking system to improve linkages to, and retention in, HIV treatment among MSM in Haiti
- Using a Simple Microsoft Access Linkage Database To improve Linkage to Care for Newly Diagnosed HIV Positive Clients: The Case of a Community Based HIV Care and Treatment Project in Zimbabwe
- Using mobile technology to collect routine patient satisfaction data to improve HIV services for key populations
- Using social networks to identify and refer underserved men who have sex with men (MSM) to HIV testing in Haiti
- Virtual outreach finds hard-to-reach HIV+ MSM in Cambodia
- When situations go from bad to worse: Strengthening collective action during periods of crisis through concrete guidance and principles for engagement
- Who drives the HIV epidemic? Risk and vulnerability profiling of clients attending HIV Counselling and Testing Centres in the metro city of Mumbai, India

Please visit the FHI 360 managed HIV Prevention Trials Network (HPTN) and the Linkages across the Continuum of HIV Services for Key Populations affected by HIV (LINKAGES) project AIDS 2018 technical presence.
