

# Alcançar project webinar series:

Remote training improves providers' knowledge of maternal, newborn and child health in Nampula Province, Mozambique

June 15, 2022

#### Agenda

- Welcome
- Opening remarks
- Project overview
- Introducing Viamo
- The Remote Training solution
- Q&A
- Closing remarks

#### **Presenters**

**Dr. Geoffrey Ezepue** Director Alcançar Project

**Dr. Dulce Nhassico** MCH/FP Team Lead **USAID** 

**Fabrice Romeo Director of Programs** Viamo

**Temoteo Tembe Design and Implementation** Manager Viamo

Gizela Azambuja **Ministry of Health** 

# Opening remarks

# Achieving Quality Health Services for Women and Children in Nampula

5-year project 2019-2024 USAID funded

#### **CONSORTIUM PARTNERS**

Somos um projecto de 5 anos, financiado pela USAID

FHI 360 é o líder do consórcio

#### **CONSORTIUM PARTNERS**

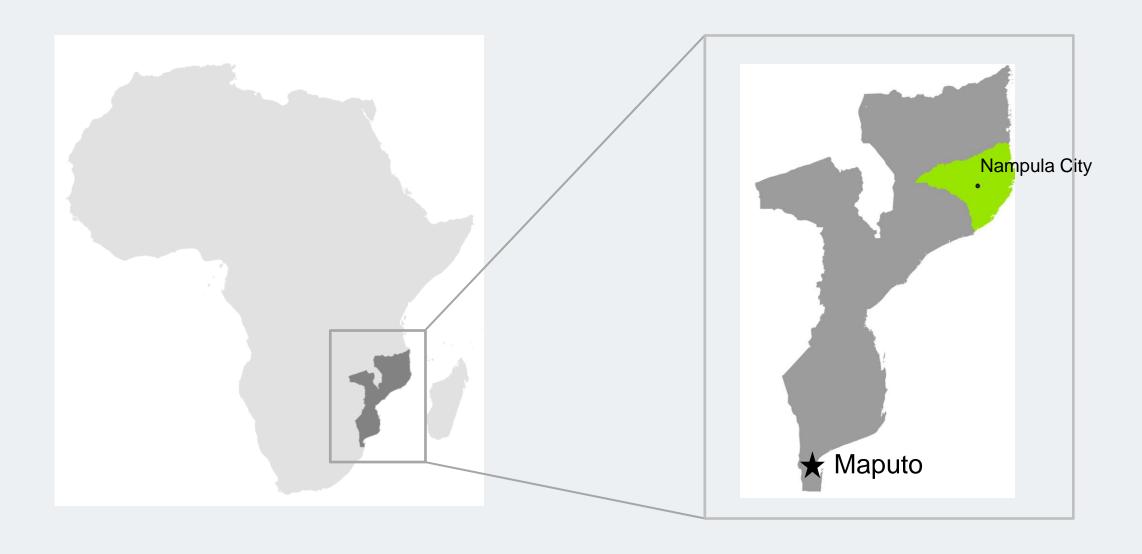

#### Goals

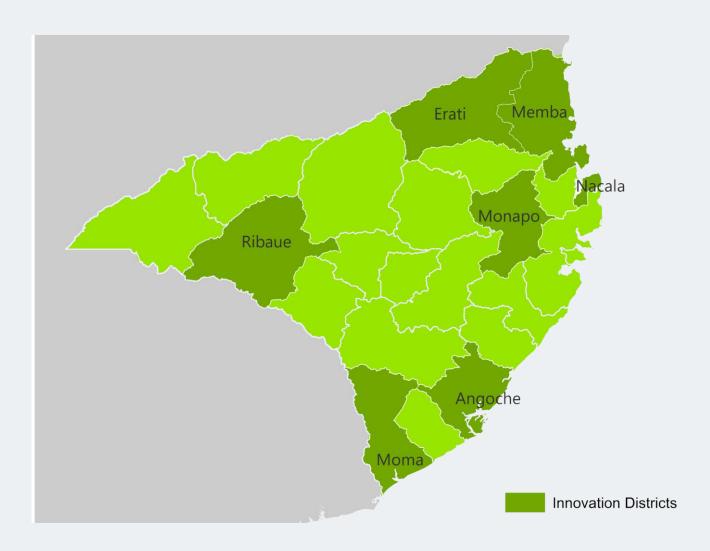

- Support the Government of the Republic of Mozambique to reduce maternal, newborn and child mortality in Nampula Province
- Establish Nampula Province as a model health system in the implementation of high impact, high quality, patient-centered and gender-responsive MNCH services

### **Mozambique: Nampula Province**

#### Nampula Province

- Alcançar works in all 23 districts of Nampula Province
- Key innovations were first implemented in 7 districts (Innovation Districts)
- Erati, Memba, Nacala Porto, Monapo, Angoche, Moma and Ribaue
- Now using phased approach to expand innovations to all 23 districts

## Ensure delivery of evidence-based high-impact practices along the continuum of care

**PREGNANCY** 

**INTRAPARTUM** 

POSTNATAL / POSTPARTUM

**CHILD** 

- Increased use of facility-based services
- Provision of quality antenatal care
- Management of pregnancy complications

- Skilled care at birth
- Management of progress of labor
- Pre-referral stabilization and transfer protocols
- Management of complications

- Routine post-natal care
- Management of newborn and post-partum complications
- Post-partum family planning services

- Prevention and management of newborn and childhood illnesses
- Routine immunizations
- Growth
   monitoring and
   screening/treatme
   nt for malnutrition

Male engagement and female empowerment curriculum; adolescent responsive health services; humanized and respectful care; improved referrals

## Strategies to deliver evidence-based high-impact practices

**PREGNANCY** 

**INTRAPARTUM** 

POSTNATAL/POSTPARTUM

**CHILD** 

On-site clinical technical support and mentorship, formalized in the District Mentorship Model

Remote trainings to nurses and APEs

Community mobilization and care-seeking for safe pregnancy

Collaboration with Transform Nutrition

QI collaboratives and clinical care packages

Obstetric and newborn care simulation approach

mParto application

Improving care for small and sick newborns

Collaboration with Improved Family Planning Initiative (IFPI) Micro-planning and implementation of integrated mobile brigades

Collaboration with MRITE (global immunization program) and Advancing Nutrition

## Strategies to deliver evidence-based high-impact practices

	PREGNANCY		INTRAPARTUM	POSTNATAL/POSTPARTUM	CHILD	
Remote trainings to nurses and APEs						

## Introducing Viamo

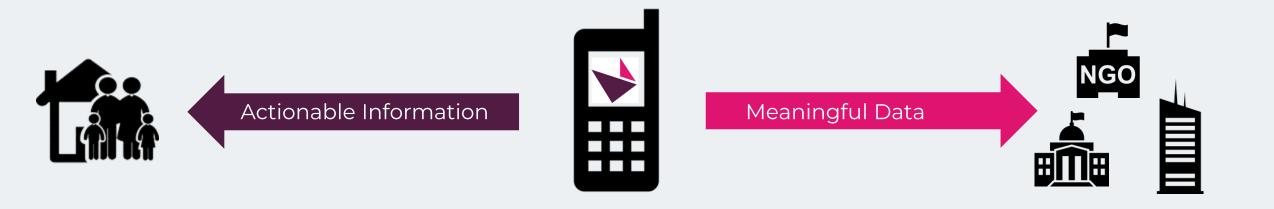

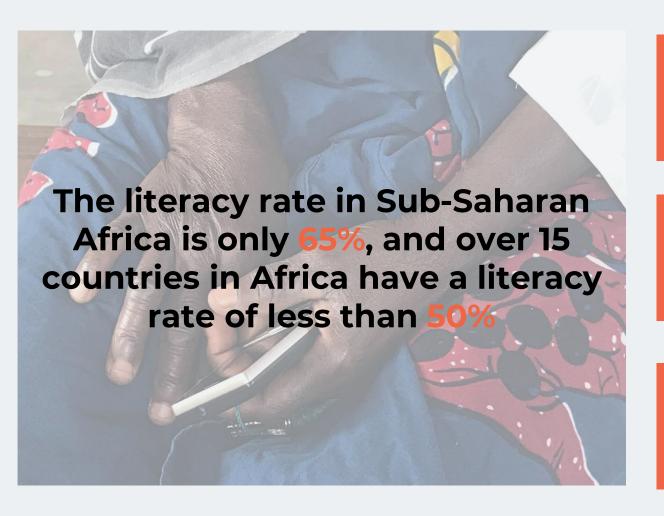

#### **Introducing Viamo**

Viamo connects individuals and organizations to make better decisions.

We envision a world where **all** people have access to the information they need to make decisions for *healthy, prosperous lives,* and have meaningful relationships with governments, civil society, and businesses.

#### Why Interactive Voice Response (IVR)?

Low literacy rates

Any phone, any network

Accessible in local languages

Viamo in Mozambique

 Active since 2016 - local presence alongside regional and global support team/expertise

 Partnership with Vodacom and TmCel for both mobile campaigns

 Live 3-2-1 service in place relevant and up to date content

 Cross sectoral projects and experience

 Plans to expand our presence, partnerships & impact

# The Remote Training Solution

#### **Remote Training Solution**

- Lessons delivered as pre-recorded audios to any type of mobile phone using IVR technology
- Engaging content developed for each lessons which will last up to five minutes
- Data on lessons with pick-up and completion rates
- Learning questions built into the lessons to check knowledge retention

#### Common Users

• Agricultural extension agents

Community health workers

Teachers

- Enumerators
- Sales agents

Public servants

- Disease surveillance agents
- Field service facilitators

# Alcançar's remote training: development and implementation

## Why remote training?

- Baseline assessment conducted at project launch to gauge knowledge of health workers
  - Knowledge gaps identified on topics include postpartum hemorrhage, pediatric warning signs, malaria and pneumonia
  - Importance of ongoing training and professional development highlighted, especially among APEs
- APEs and nurses identified as primary targets for capacity building:
  - Generally first contact for MNCH services at community-level
  - Deliver the bulk of MNCH services (preventive and curative)

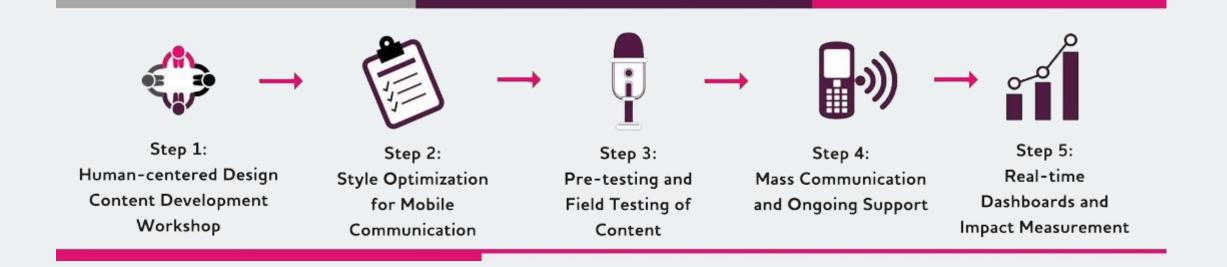

#### Content development process

- Participation of MoH at Provincial and District level and technical experts in content development process
- Priority topics for training informed by Alcançar's baseline assessment
- Content committees formed to elaborate training content
  - Content based on existing protocols and training manuals approved by MoH
  - Content adapted culturally for Nampula province

- Structure of each session:
  - Intro
  - Objective
  - Narrative
  - Conclusion
  - Quiz

#### Content development process

- Content development informed by Viamo's Human-Centered Design (HCD) approach
- Content optimized for mobile phone and recorded in Macua and Portuguese
- Content pre-tested to ascertain comprehension

#### Content development process

- Four rounds developed
  - Average of 6 lessons for each RT
  - Topics: pregnancy, malaria, diarrhea, pneumonia and malnutrition
  - Rounds deployed in 7 innovation districts between November 2020 to August 2021
  - Rounds #1 and #2 deployed to 191 APEs and 176 nurses
  - Rounds #3 and #4 deployed to 463 APEs and 243 nurses

## Demonstration

### **APES module 1.3: Danger signs of pregnancy**

Learning Objectives:

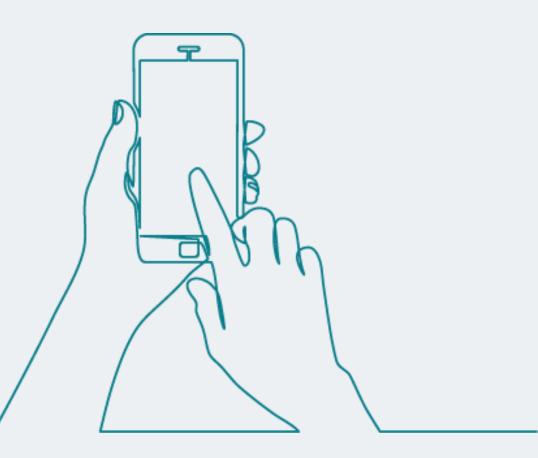

1. Knowing the danger signs and symptoms of pregnancy

2. Communicating those signs effectively to women

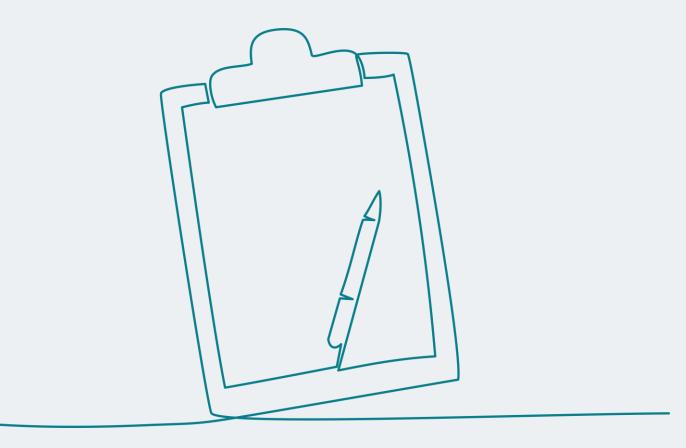

3. First aid management of these danger signs

## Demonstration

**APES module 1.3: Danger signs of pregnancy** 

## Results

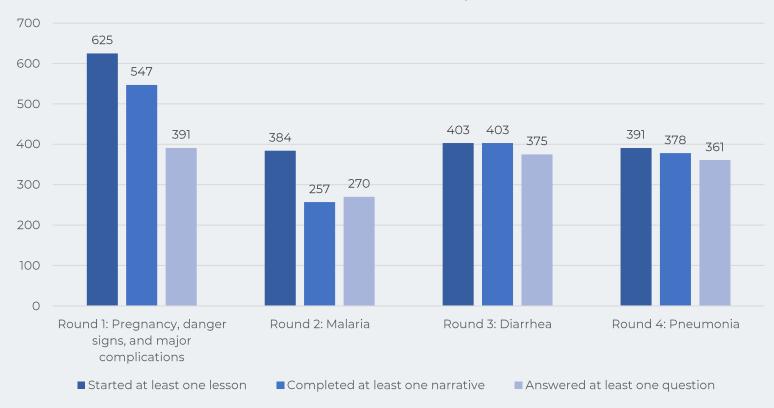

#### **Impact - APEs**

On average 451 started one lesson

On average 396 completed the narrative

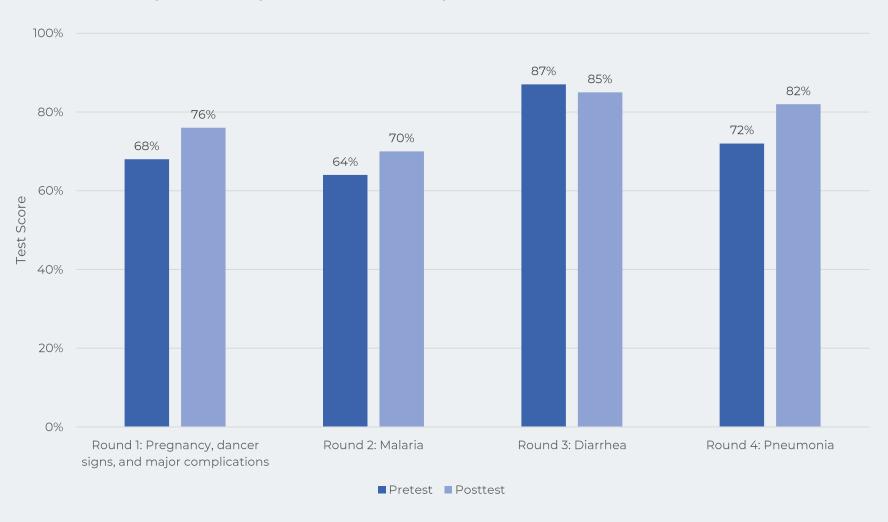

On average 349 answered one question

#### Number of APEs reached with remote training (November 2020–September 2021)

#### **Impact - APEs**

#### Remote training knowledge retention among APEs (November 2020–September 2021)

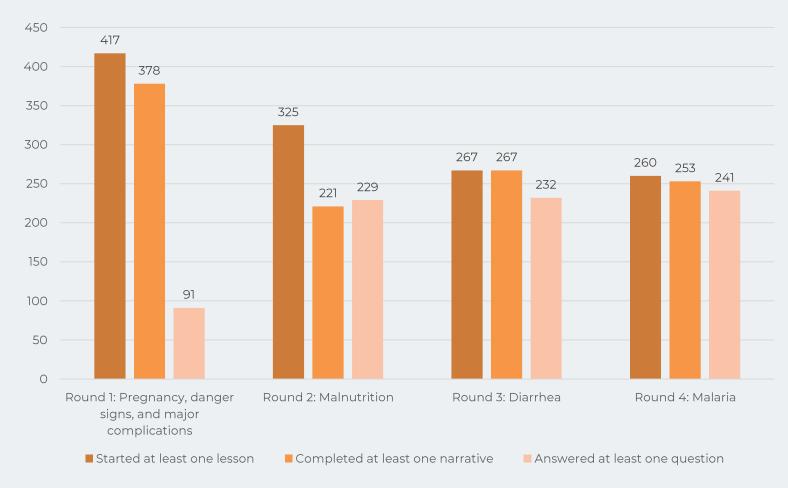

### **Impact - Nurses**

Number of nurses reached with remote training (November 2020–September 2021)

Non average 371 started one lesson

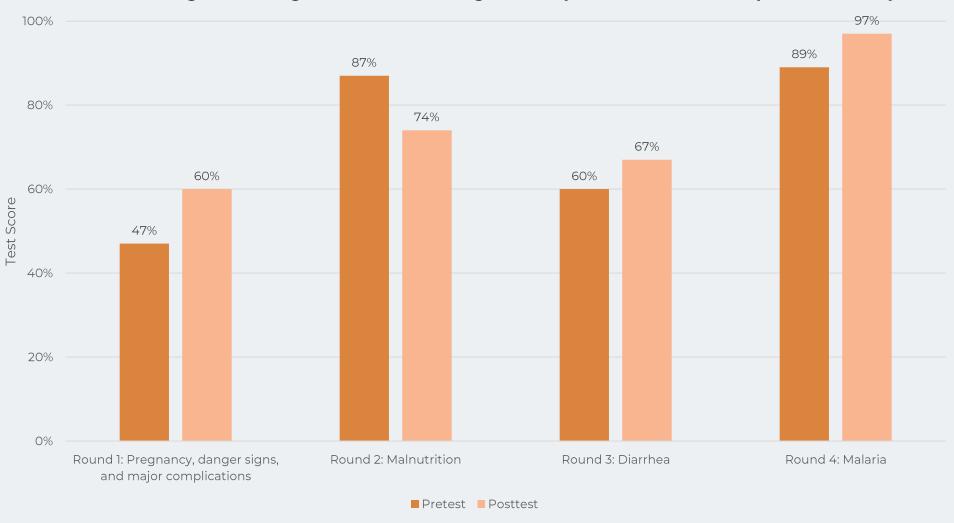

On average 280 completed the narrative

On average 198 answered one question

### **Impact - Nurses**

#### Remote training knowledge retention among nurses (November 2020–September 2021)

The remote training was important, because it provided evidence and expanded my knowledge. I learned how to prevent complications in maternal and child health patients by identifying danger signs.

Olga, nurse in Angoche district

#### **Lucas Adamastor**

Community health worker, Namialo health center, Meconta Sede district

## Next steps

### Implications and conclusions

Remote training offers a cost-effective solution that can be deployed for ongoing training

Proved effective for continued professional development within COVID-19 context

Rounds deployed this fiscal year to 16 other districts covered by Alcançar

288 APEs and 312 nurses targeted

Results expected to inform MoH on the extent of knowledge gaps among frontline health providers

Data could inform updates to national MNCH training protocol

## Q&A

## **Upcoming webinars**

Tema/Topic	Mês/Month
<b>mParto em Monapo</b> : Usando um aplicativo digital para monitorar mulheres durante o trabalho de parto, parto e encaminhamento	Setembro/ September 2022
mParto in Monapo: Using a digital application to monitor women during labor, delivery and referral	
<b>Mobilização Comunitária e Gênero:</b> Mobilização comunitária e GESI como estratégias para a redução da mortalidade materna neonatal e infantil em Nampula	Novembro/ November 2022
<b>Community Mobilization and Gender:</b> Community mobilization and GESI as strategies to reduce maternal, newborn and child mortality in Nampula Province	
<b>Simulação obstétrica:</b> resultados da pesquisa de implementação sobre o efeito da simulação para os profissionais de saúde da linha de frente	Janeiro/January 2023
<b>Obstetric simulation</b> : findings from implementation research on effect of simulation for frontline health workers	
<b>Melhoria da Qualidade:</b> Ganhos e aprendizados da colaborativa Alcançar de redução de mortalidade materno infantil	Março/March 2023
<b>Quality improvement:</b> Achievements and lessons learned from the Alcançar collaborative for the reduction of maternal and infant mortality	

# Closing remarks

## THANKYOU
