To strengthen education systems in conflict and crisis-affected contexts, FHI 360 uses a conflict-sensitive education approach. Focusing on positive change, we begin by conducting conflict and education risk analyses to maximize positive impacts of our activities, which contribute to peace, and minimize the negative impacts, which contribute to conflict. Our education programs prioritize learner and teacher well-being with an emphasis on psychosocial support, social-emotional learning, safe learning environments, equitable access to quality learning opportunities and building local institutional capacity. Throughout program implementation, we conduct rolling assessments and employ complexity-aware monitoring strategies enable constant learning and adaptive management.

**APPLYING OUR TECHNICAL EXPERTISE**

**Fragile Environments**

In the **DR Congo**, FHI 360 is providing out-of-school children with access to quality education. Through the USAID/DFID Accelerating Equitable Access to School, Reading, Student Retention and Accountability (ACCELERE!) project, FHI 360 helped launch the first national language program for reading in Accelerated Learning Programs (ALPs). This included developing materials such as scripted facilitator guides, read-alouds and learner books for Grade 1-4 equivalents. To meet the needs of ALP learners, FHI 360 integrated life skills and psychosocial themes into the curriculum. In non-formal schools, ACCELERE! is working with over 600 teachers and more than 25,000 students across nearly 300 centers.

Through the USAID-funded **Afghanistan** University Support and Workforce Development Program (USWDP), FHI 360 is building the capacity of Afghanistan’s Ministry of Higher Education to improve quality assurance, align academic programs with workforce needs and produce graduates with the knowledge and skills to secure employment. The project is working with 11 public universities, including two institutions in particularly volatile provinces, and is collaborating with the country’s Ministry of Higher Education and the private sector to develop new associate degrees that will lead to the creation of a community college system. USWDP is responding to the unique challenges students face as a result of insecurity in the region with strategies to improve safe access to programming, such as providing job readiness...
About FHI 360: FHI 360 is a nonprofit human development organization dedicated to improving lives in lasting ways by advancing integrated, locally driven solutions. Our staff includes experts in health, education, nutrition, environment, economic development, civil society, gender, youth, research, technology, communication and social marketing—creating a unique mix of capabilities to address today’s interrelated development challenges. FHI 360 serves more than 70 countries and all U.S. states and territories.

and soft skills training in socially acceptable and secure boundaries of universities. The program is also addressing issues of gender-based violence and prejudice by supporting the implementation of the National Higher Education Gender Strategy, which is helping to ensure that university campuses in all parts of Afghanistan are safe environments for female faculty members and students.

In El Salvador, FHI 360 and FEDISAL, a local NGO, worked with a network of local civil society organizations to address barriers to education—including gang recruitment and violence—for children and youth in El Salvador. Funded by USAID, the Education for Children and Youth Program (ECYP) improved educational opportunities and reduced school dropout among students in grades 7-9 and out-of-school youth living in areas with high crime rates. Building on an existing system of school networks, the FHI 360 helped to create student-centered learning environments in 410 lower secondary schools in 18 high-risk municipalities.

**Chronic Crisis & Refugee Contexts**

As a major partner on the USAID-funded Room to Learn (RtL) project in South Sudan, FHI 360 helped to expand safe education services, enhance education relevance and support education management. FHI 360 and project partners also provided literacy programming, including developing curriculum and teaching and learning materials. Language movement as a result of the displacement of millions during the war, coupled with a national language policy influx, complicated implementation of literacy activities. FHI 360 and partners effectively navigated this complex environment by taking a holistic perspective that accounted for instructional best practices, policy climate, teacher ability, sustainability and project goals.

**Post-Conflict & Crisis Recovery**

Through the USAID-funded Liberia Teacher Training Program II (LTTP II), FHI 360 helped the Ministry of Education adapt to its country’s dynamic post-conflict context. LTTP II helped to rebuild pre- and in-service teacher professional development systems to address the critical shortage of qualified teachers. LTTPII’s teacher-training activities used a conflict-sensitive approach that emphasized peaceful, demilitarized education. The curriculum included multi-ethnic Liberian stories that highlighted similarities rather than differences. Because the war dramatically reduced the number of female teachers, LTTP II provided stipends and scholarships to women in graduate education programs.

**CROSS-CUTTING TECHNICAL EXPERTISE**

Our education work in conflict, crisis and fragile environments leverages our expertise in many sectors of development and our long experience of successful programming in these contexts. By connecting people, ideas and resources from across FHI 360, we can respond to and meet diverse needs.

**Related Expertise at FHI 360**

- Civil society strengthening
